CIA No. 3590  
13 October 1965

Thanks for drawing the problem of estimating recovery costs to my attention. I have reviewed the two methodologies and find that the one our construction engineers, [redacted] recommend is preferable.

The great merit of their method, in my view, is that it takes account of the import costs which the Vietnamese would have to lay out to repair these facilities. Therefore, I suggest we use their methodology.

Sincerely yours,

25X1A9A
